## <Software update procedure>

- 1 : It is necessary to update the asio driver to use it with the new software.
  - Please download and install from our website.

 $\$ Your Windows PC must be connected to the internet.

2: Click the Windows Start button and select "SPEC Diretta ASIO" from the SPEC folder.

3: "Diretta ASIO Configure" will start, so click "update".(previous Ver. "config")

Diretta ASIO configure	$\times$			
Connect Target SPEC_Bridge_	cancel			
find update default debug	save			
Phase Normal ~ Target Configurator	config			
SPEC Diretta (ASIO)				

XTarget Configurator is used in the Wi-Fi settings of RMP-UB1.

<u>4: The "Setting" screen will start, so check that "SPEC\_Bridge\_xxx"</u> is displayed in Update Target.
