<Software update procedure>

1 : It is necessary to update the asio driver to use it with the new software.
　Please download and install from our website.
　　※Your Windows PC must be connected to the internet.

2 : Click the Windows Start button and select "SPEC Diretta ASIO" from the SPEC folder.

3 : "Diretta ASIO Configure" will start, so click "config".

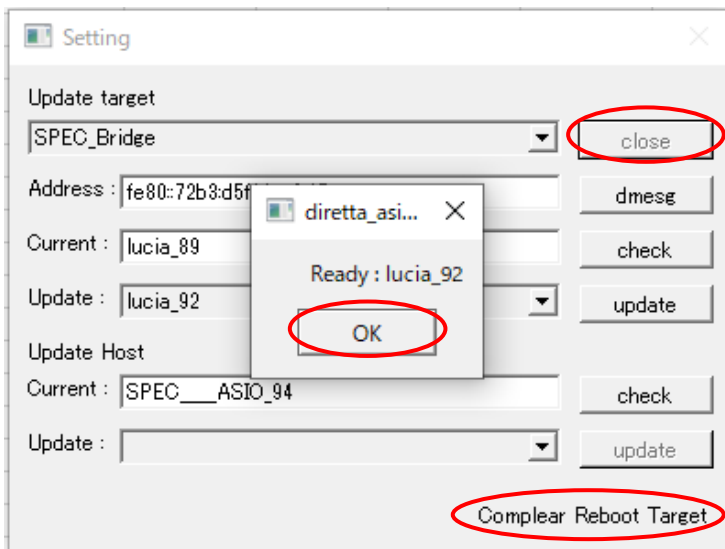

4 : The "Setting" screen will start, so check that "SPEC_Bridge" is displayed in Update Target.

5：If you click "Check" and there is new firmware, a display different from the current display
　　(the one with a large value of lucia_xx) will be displayed in the Update section.
　　If the number shown is large, there is a new farm, so click "Update".

6：The firmware download will start and will be updated.
　　(It takes about 2 to 5 minutes.)
　　When completed, "Ready: lucia_xx" will be displayed, so click the OK button.
　　Make sure that "Complear Reboot Target" is displayed, and then click "Close" to exit.

The update is complete.
